TK900 GPS TRACKER

TRUCK INSTALLATION GUIDE

QUICK & EASY | STEP-BY-STEP

Follow this guide to install your TK900 GPS Tracker quickly and securely. Once installed, you'll be able to monitor your vehicle in real time.

REAL-TIME TRACKING
Live location updates

SMART ALERTS
Instant notifications

SECURE & RELIABLE
Built for any condition

EASY MANAGEMENT
Mobile & web app

1 LOCATE THE DEVICE

Choose a hidden location inside the dashboard or under the panel.

2 POWER OFF THE VEHICLE

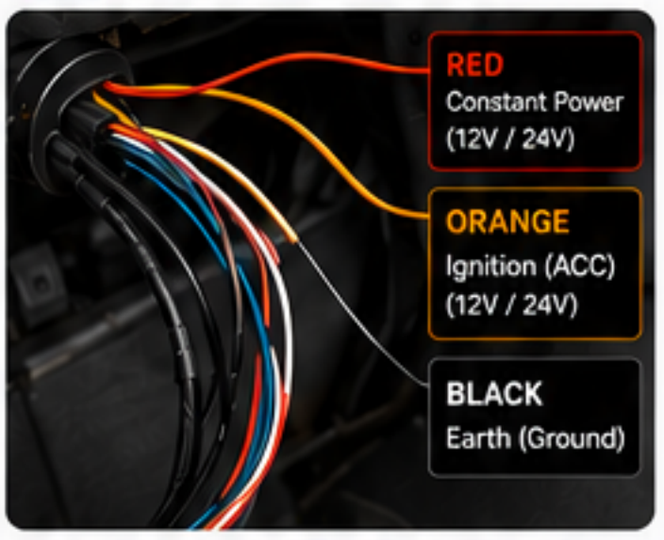

Turn off the ignition and remove the key for safety.

3 ACCESS THE WIRING

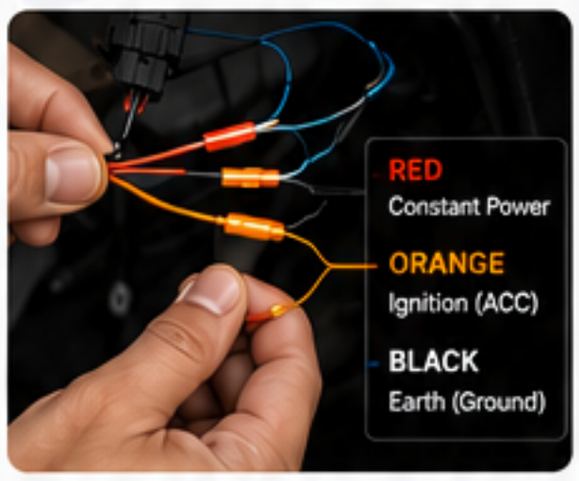

Remove the dashboard panel to access the vehicle wiring harness.

4 IDENTIFY THE WIRES

Find the vehicle's power, ignition (ACC) and ground wires.

5 CONNECT THE WIRES

Connect the tracker wires as follows:
Red to Constant Power,
Orange to Ignition (ACC),
Black to Earth (Ground).

6 SECURE THE CONNECTIONS

Insulate all connections and secure the wiring using cable ties.

7 MOUNT THE DEVICE

Secure the tracker using double-sided tape or cable ties in a hidden location.

8 POWER ON THE VEHICLE

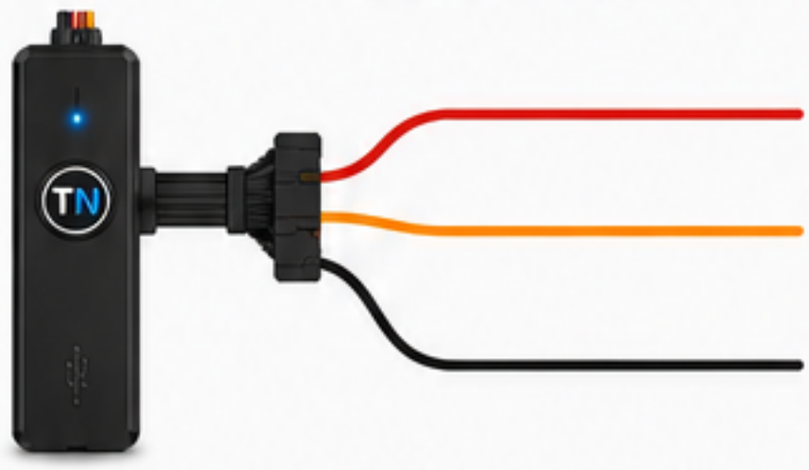

Turn on the ignition.
The tracker LED will light up.

9 CHECK CONNECTION & TEST

Check the LED status (Solid/Flash) and verify the device is online in the TrackNow app.

WIRING DIAGRAM

INSTALLATION COMPLETE!

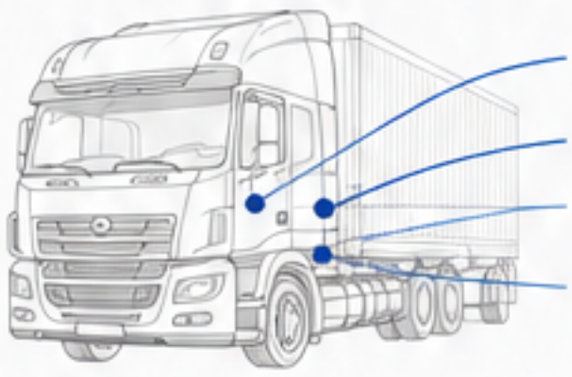

Your TK900 GPS Tracker is now installed and ready to keep you connected and in control.

- LIVE TRACKING
- MOVEMENT ALERTS
- POWER ALERTS
- BILGE ALERTS

IMPORTANT NOTES

- Use a multimeter to confirm correct voltage before connecting.
- Ensure all connections are tight and insulated.
- Avoid installing near moving parts or heat sources.
- Route wires away from sharp edges and metal parts.
- Test the device and confirm online status in the TrackNow app.

RECOMMENDED INSTALLATION LOCATIONS

- Under dashboard (inside trim panels)
- Behind glove box
- Inside storage compartment
- Under sleeper bunk (for long-haul trucks)
